PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Python, Power BI and Advanced Excel, with hands-on experience transforming complex operational datasets into decision-ready insights. Experienced in data cleaning, exploratory data analysis, data modelling, KPI development and interactive dashboard design, with portfolio projects spanning healthcare, telecommunications, consumer goods, and media & entertainment. Brings additional frontline healthcare experience and a strong understanding of data quality, operational reporting and GDPR-compliant information handling.

SKILLS

Technical Skills

- | | | |
|------------------------|------------------|-----------------------------|
| - SQL | - NumPy | - Data Cleaning |
| - Microsoft SQL Server | - Power BI | - Exploratory Data Analysis |
| - MySQL | - DAX | - Git |
| - PostgreSQL | - Power Query | - GitHub |
| - Python | - Advanced Excel | - GDPR Compliance |
| - Pandas | - Data Modelling | |

Core Skills

- | | | |
|-----------------------------------|--------------------|--------------------------|
| - Healthcare Operations Analytics | - SLA Analysis | - Root-Cause Analysis |
| - Capacity Planning | - Dashboard Design | - Data Quality Assurance |
| - Workforce Analytics | - KPI Development | |

WORK EXPERIENCE

Data Analytics Intern - *Amdari* | Apr 2026 - Sep 2026 · United Kingdom

- Delivered end-to-end analytics across healthcare, telecommunications, consumer goods and media, producing interactive Power BI dashboards and SQL/Pandas analytical workflows focused on operational decision-making.
- Built Horizon Health Network capacity dashboard integrating admissions, bed occupancy and staffing across 37 hospitals, surfacing 86% average bed occupancy, 543 average available beds and 46.7% safe-ratio compliance to prioritise capacity actions.
- Analysed 3,500 service tickets for NorthBridge Health Services, identifying a 21.5% SLA breach rate and escalation patterns, and developed data-driven recommendations to improve ticket prioritisation, SLA performance and backlog management.

Support Worker - *4Life Healthcare Services Ltd* | Jun 2026 - Present · Canterbury, England, United Kingdom

- Maintained structured digital care records and incident documentation to support continuity of care and reliable information sharing across shifts, upholding GDPR requirements.
- Monitored and recorded changes in wellbeing and support needs, identifying changes and patterns and escalating significant observations to appropriate colleagues to support timely operational responses.
- Applied rigorous data-accuracy and validation principles to time-sensitive care information, ensuring documentation suitability for handover, audit and care-review processes.

Healthcare Assistant (Bank Staff) - *Sandwell and West Birmingham NHS Trust* | Jan 2025 - Present · United Kingdom

- Recorded patient observations and clinical information in digital systems with consistent timeliness and completeness to support acute operational workflows.
- Supported multidisciplinary teams by maintaining structured records and ensuring GDPR-compliant handling of sensitive patient data during high-volume periods.

Healthcare Assistant - *TL Care Services Ltd* | Oct 2023 - May 2026 · United Kingdom

- Maintained detailed care records and progress notes that supported continuity across individuals, families and professionals and informed operational reviews.
- Used structured record-keeping to highlight trends in wellbeing and escalate concerns, contributing to service-delivery consistency and audit readiness.

PROJECTS

Horizon Health Network — Bed Demand & Workforce Analytics - *Power BI | SQL | DAX | Power Query | Data Modelling*

Integrated admissions, bed inventory and staffing data across 37 hospitals to build an operational Power BI dashboard tracking occupancy, available and staffed beds, and safe-ratio compliance to support capacity and workforce analysis.

NorthBridge Health Services — Ticket & SLA Optimisation - *SQL | Power BI | DAX | Data Modelling*

Analysed 3,500 service tickets across 114 agents and 72 clients to identify SLA breach, escalation and backlog patterns, developing data-driven recommendations for ticket prioritisation and service-performance improvement.

Network Outage Root-Cause Analysis — Telecommunications - *SQL | Python | Power BI*

Analysed network outage data to identify recurring failure patterns and operational drivers, using root-cause analysis and visualisation to highlight opportunities for improved network reliability.

Production Downtime Analysis — Consumer Goods - *SQL | Python | Power BI*

Analysed manufacturing downtime data to identify recurring disruption patterns, operational bottlenecks and major contributors to lost production time, translating findings into actionable operational insights.

Viewer Engagement Analytics — Media & Entertainment - *SQL | Python | Power BI*

Analysed viewer engagement and content-performance data to identify audience behaviour patterns, content trends and performance differences, presenting findings through interactive visualisations and KPIs.

EDUCATION

Bachelor of Science (BSc) in Human Anatomy - *University of Port Harcourt* | 2009
